August 2014

Dear Homeowner,

We are pleased to announce that Carnelian Woods has answered the call to an item of interest in our community.

Of late, kayaks and paddle boards are all the rage at Lake Tahoe and other large bodies of water. The problem is what to do with them when not in use or stored upon your vehicle.

Believe it or not, the composition of these devices can be an extreme fire hazard should a fire break out adjacent to or under your unit. That is one of the purposes of the Rules and Regulations section, **STORAGE, PERSONAL PROPERTY AND DECKS, Page 4. These items cannot be stored under units.**

We now have in place an area and device to store your kayak or paddle board.

There are two racks at the boat storage area at the end of Silver Pine Drive, where you can place your device. You will need a chain or cable and lock to secure it to the metal rack. Please remove the device from under your unit and place it at the appropriate location as stated above.

Yours truly,

Les Terry
General Manager
Carnelian Woods
